## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments filed 6/12/07 have been fully considered but they are not persuasive. Applicant argues the pocket of Mendonca does not correspond with the hole of the claimed invention and the only hole in Mendonca that may pass through the garment would be the button holes in the event the buttons are in the pocket material. However, as broadly as claimed the through-passing hole is considered by the examiner to be met by Mendonca as the hole of Mendonca passes through the materials that forms the pocket.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 4, 6, 7, 11, 13, and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Mendonca USPN 6110156. Mendonca discloses an ostomy support garment having a hole in the interior of pocket 30 for receiving a stoma, the hole having a stabilized edge 40 provided with an element , buttons 50 allowing an increase or reduction of the hole. The hole is provided with a slit (opening of the pocket and pleat 60) into the material. The element is a button, a fastening element.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 5, 8-10, 12, and 14-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mendonca USPN 6110156.

As to claims 5, 12, 10, and 17, Mendonca discloses the present invention substantially as claimed. Mendonca discloses a button fastening element instead of a lace fastening element. However, it would have been an obvious matter of design choice to use a lace fastener or a button fastener, since the fastening elements are obvious variants, and it appears that the invention would work equally well with a lace fastener.

As to claims 9 and 16, Mendonca does not specifically disclose the garment comprises elastic material. However, Mendonca teaches the garment may be underpants and bathing trunks, which are known in the art to comprise elastic materials (col. 3, lines 33-40).

***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP
